REACH THE TOP

## **SERVICES WE PROVIDE**

- 01. Ultrasonic Thickness Measurements**
- 02. UTM Rope Access**
- 03. Lifeboat-Davit Inspection**
- 04. LSA-FFE**
- 05. Non Destructive Testing**
- 06. Cargo Gear**
- 07. Means of Access**
- 08. Hatch Leak Inspections**

One core value in mind.

**Total survey completion.**

**Total customer satisfaction.**

# 01.

## Ultrasonic Thickness Measurements

We carry years of practical training in the field of UTM & Ship Repairs.

Our Operators can meet the Requirements of any Classification Survey in any type of Vessel.

Our staff act as multitools while on your Vessel, providing services beyond simple UTM, to cover steel fitting, welding inspections, monitoring of staging, etc.

Certified By: ABS, BV, DNV-GL, HRS, KRS, LRS, NKK, RINA

# 02.

## UTM Rope Access

Our certified IRATA Technicians, provide a clear Close-Up and UTM Assessment of the Vessel's Non-Accessible Sections.

Our team employs a CCTV system to allow remote access to these locations, to attending third parties.

Our Rope Access Technique can be carried out under any condition, and eliminates costly and Time-Consuming Rafting, Staging & Cherry Picker access. Moreover, it allows to complete Ship Surveys combined with In-Water Surveys without entering a Shipyard.

# 03.

## Lifeboat-Davit Inspection

We offer a wide array of services from Annual & 5-Yearly Surveys, to Load Tests & Lifeboat Repairs.

Our service engineers, carry certification from all respectable IACS members, as well as various markets from Japan, Korea & Europe and are ready to accomplish any kind of inspection. Load tests can be carried out through our own water weights.

Certified By: ABS, BV, DNV-GL, KRS, LRS, NKK, RINA

# 04.

## LSA-FFE

Worldwide inspection of LSA-FFE through our trusted liaisons.

Our Service additionally covers the supply of LSA-FFE spares as well as Liferrafts on either sale or contract basis.

# 05.

## Non Destructive Testing

Our certified inspectors, can carry out NDT Surveys under most common methods of UT, MT, PT & VT. We additionally support Phased Array inspections.

Our NDT service, proactively assist Supt and Chief Engineers around the world, to monitor engine performance through the method of Replica Liner.

# 06.

## Cargo Gear

Whether Cargo Cranes or Lifting Appliances, we can support load testing through our calibrated load cells or through our water weights.

# 07.

## Means Of Access

Inspection & Load Testing of Accommodation & Pilot Ladders through our water weights.

# 08.

## Hatch Leak Inspections

We provide clear and definite indication on Hatch Cover Tightness through the method of Ultrasound.

Far more accurate and definite than the Hose or Chalk tests carried out by most. This technique allows for pinpoint accuracy of the leaking locations around a Hatch Cover's sealing points, and actively protects Structure & Cargo.
